OUR VALUES

Loyalty to our community

Our loyalty is first reflected in the relationship we build with our clients, supporting them in creating durable projects that stand the test of time. It is also expressed through our commitment to designing products that withstand generation after generation, while remaining true to evolving trends and design innovation.

FROM LEFT TO RIGHT:
Maria Correia, Sabrina Correia, Rosa Ciccarello,
Horacio Correia, Jessye Correia and Bobby Correia.

Trust from *generation* to generation

Founded by Rosa and Horacio Correia and now carried forward by their children, Rinox remains above all a family business guided by loyalty. Loyalty to values passed down from generation to generation, loyalty to our customers who place their trust in us, and loyalty to our desire to innovate without ever compromising quality. This deep connection to our roots and our community ensures the continuity of a know-how that stands the test of time.

Made in Canada

Rinox products are proudly manufactured locally. We offer you forward-thinking concrete products whose components are carefully selected, stable, and precisely calibrated to ensure superior quality. By choosing Rinox, you are not only choosing exceptional products that combine innovation and performance, but you are also contributing in a meaningful way to supporting the local economy.

OUR VALUES

Products that inspire *creativity*

Creativity is born from boldness and the desire to reinvent space. Our products offer the freedom to play with shapes, textures, and colors, allowing each project to be transformed into a unique visual and sensory experience. Beyond functionality, they become a language that expresses your vision and redefines contemporary architecture.

PROMA BARRETTE CAVIAR & HUSKY

Create a striking visual effect by playing with the different colors of the same product. Install Proma Barrette and create a subtle or bold gradient according to your preferences. By alternating lighter and darker shades, you will add depth and movement to your project.

PROMA XL OKA BEIGE

The *nature* and design

Integrate green spaces into the layout of your slabs to create a design that is both lively and original. By leaving certain areas open to vegetation, you add a natural touch that softens geometric lines. Grass or small plants blend harmoniously with the slabs to form unique patterns, combining elegance, freshness, and visual balance in your backyard.

Send us your unique projects:

OUR VALUES

Expertise and Know-How Above All

We recently transformed our dry-cast plant with cutting-edge technologies that redefine our production standards. This evolution represents far more than a simple modernization; it reflects our commitment to pushing the boundaries of what is possible, innovating without compromise, and creating products of remarkable quality.

We hold more than 30 patents that demonstrate over 25 years of expertise. Each of our developments is designed to simplify installation while delivering durability and performance. Through these exclusive innovations, we empower our clients to bring exceptional projects to life, combining superior quality with forward-thinking design.

The *Best* Retaining Walls in the Industry

For over 25 years, Rinox has been a trusted name in the industry, recognized especially for the superior quality of its retaining walls. We believe that every detail matters when it comes to efficiency and ease of installation. That's why we have revolutionized the way retaining walls are designed. Whether building straight walls or incorporating complex angles, the K-Block system ensures a perfectly stable and secure structure every time.

OUR K-BLOCK SYSTEM

ZUKO FLEX ASH CHARCOAL

*Certain conditions apply. See details online.

Extremely rich and *durable* colors

RinoXtrem technology enables the production of exceptionally durable and ultra-vibrant, color-fade resistant products. A unique technology that stands out in the industry because the color is found throughout and within the product. Our products are designed in a meticulously controlled environment. We carefully observe humidity and density levels and rigorously analyze all factors surrounding the production process. The integrity of our colors is due to the perfect blend of quality control and the high performance of our state-of-the-art equipment.

25-year transferable protection on our products including installation.*

OUR VALUES

Growth in sustainable development

Since 2015, Rinox has been collaborating with a leader in low-carbon cement production. Together, we share a common vision of sustainability, investing several million dollars to modernize our facilities and stay at the forefront of green technology. Our products are proudly made in Canada, supporting the local economy while reducing our environmental footprint.

OUR VALUES

A Team Always pushing *Innovation*

10% *less* pollutant emissions

ELEMENT™ cements are designed to deliver performance and durability while reducing their environmental impact. Thanks to a lower-carbon manufacturing process, they produce up to 10% fewer pollutant emissions than competing cements. Used in a wide range of applications—from ready-mix concrete to precast concrete—ELEMENT™ cements meet the highest industry quality standards, including ASTM and CSA.

Color of the Year

LANDSCAPE

Oka Beige

2026

SOOTHING ELEGANCE

Oka Beige perfectly embodies the trend toward natural, calming tones that dominates design in 2026. Its soft hue, inspired by sand and coastal landscapes, creates a warm and balanced atmosphere. It stands out for its refined simplicity, providing a neutral base that highlights the shapes and textures of Rinox products. Oka Beige integrates elegantly into all design styles, from the most contemporary to the most classic.

60MM VS 90MM

The *Difference* Between Pavers and Slabs

How to Choose the Right Outdoor Surface?

Before selecting the ideal surface for your outdoor spaces, it is essential to consider how you plan to use it. Pavers, which are thicker and more durable, are designed to withstand the weight of vehicles and are the perfect choice for driveways. Slabs, on the other hand, are thinner and intended for pedestrian areas such as patios and relaxation corners.

EACH WITH ITS PURPOSE

Both offer exceptional durability and performance. Designed with the same quality and attention to detail, pavers and slabs differ only in their purpose. Each is specifically crafted to meet the unique needs of different outdoor spaces, whether it's an elegant pedestrian area or a zone subject to vehicle traffic.

PROMA XL MIST

PROMA XL WHISTLER

PRESTIGE COLOR*

PRESTIGE COLORS

Prestige colors, such as Mist and Whistler, are available exclusively in slabs. This choice preserves the beauty and uniformity of these lighter shades by preventing tire marks. Their natural brilliance remains intact, even after several seasons.

Permeable

Eco-friendly and
dynamic product for
your outdoor spaces

Ava
Venza

VENZA CAVIAR

The *advantages* of permeable pavers

HOW DOES IT WORK?

Permeable pavers are designed to allow rainwater to infiltrate directly into the ground rather than pooling or running off as it does on traditional surfaces. Through strategically spaced joints, water flows between the pavers and is filtered by the underlying soil layers, helping recharge groundwater and prevent runoff and erosion. This sustainable paving solution is ideal for driveways, patios, walkways, and parking areas, as it manages water on site, promotes soil health, and supports plant growth, all while offering a modern and functional appearance.

AVA CAVIAR, TRUFFLE & OKA BEIGE

REDUCE THE RISK OF FLOODING

Rinox permeable pavers offer a sustainable solution to reduce the risk of flooding, an increasingly common issue in Canada as storms intensify. By allowing rainwater to infiltrate directly into the ground, they relieve pressure on drainage systems and prevent surface water buildup. Whether for driveways, parking lots, or commercial spaces, this paving helps protect your landscapes and property while supporting responsible stormwater management.

“Limit the transport of pollutants to *rivers* and lakes.”

ECOLOGICAL BENEFITS

Rinox permeable pavers offer a sustainable solution that directly supports the environment. By allowing rainwater to infiltrate the ground, they help recharge groundwater, nourish vegetation, and maintain the natural balance of the soil. By reducing runoff, they prevent erosion and limit the transport of pollutants to rivers and lakes. More than just a surface, they help protect local biodiversity and improve soil health.

These paving systems integrate seamlessly with green infrastructure and can contribute to environmental certifications such as LEED. Their durability, combined with their positive environmental impact, makes Rinox permeable pavers a cost-effective and eco-friendly solution, ideal for residential and commercial projects focused on sustainability.

FIRE PITS

How to Design Your Own *Fireplace* with Rinox Products

THE ESSENCE OF OUTDOOR SPACES

Today, the backyard is much more than just a green space: it is a true extension of the home, a place to relax, have fun, and reconnect with nature. Creating a harmonious and functional layout can transform this area into a genuine haven of peace. Adding a retaining wall, for example, can help optimize the use of the terrain. Rinox products are designed to inspire your creativity and help you design an outdoor space that reflects your style. Here are some inspiring ideas for outdoor fireplaces.

ORA WALL WHISTLER | PROMA XL WHISTLER (EVENING LIGHTING)

ORA WALL ASH CHARCOAL | PROMA XL COPING WHISTLER

ELEGANCE AND TOGETHERNESS

A sunken fireplace creates an intimate and inviting atmosphere, perfect for gathering family and friends. To design this type of setup, excavate the area to the desired depth and define it using Rinox retaining walls. Add a stable base of slabs to ensure safety and durability. The refined textures of Rinox products will complete the look, transforming your backyard into a warm and elegant retreat.

BRING YOUR IDEAS TO LIFE

Rinox products offer countless possibilities for designing your outdoor fireplace. Slabs and pavers can be used to build the base and walls of the fireplace. Combine different formats and finishes to add texture and character to your layout. By choosing from Rinox collections, you benefit from durable, heat-resistant materials while creating a fireplace that integrates seamlessly into your outdoor space.

Online Resource Center

Whether you are an architect, contractor, designer, landscaper, mason, or homeowner, our resource center has been designed to meet all your needs, all in *one place*.

TECHNICAL DATA SHEETS AND NORMS

Explore our detailed technical data sheets that provide all the necessary information about our products, including their features, standards, and installation recommendations. These documents are essential to ensure that every technical aspect of your projects is covered, guaranteeing results that meet the highest standards.

CAD DRAWINGS

CADdetails is an online platform that provides architects, designers, and contractors with detailed CAD drawings, BIM models, and specifications for building and landscaping products. Our products are now available on CADdetails, making it easier to integrate Rinox landscaping solutions into your designs.

3D TEXTURES

These new textures, created using a unique product scanning technology, will deliver the most realistic renderings quickly and efficiently. Create 3D designs that will impress like never before.

lightbeans®

HOME EXTERIOR DESIGN TOOL

Explore this tool designed to help you visualize Rinox masonry products and their stunning range of colors blending seamlessly with Rialux aluminum products. Select the scene of your choice and the specific products you're considering, gaining valuable insights to make your final decision with confidence. With this innovative tool at your fingertips, designing your dream exterior is just a few clicks away.

COLOR SAMPLES

Whether you're planning a masonry, landscaping, or interior design project, our color samples allow you to visualize the shades and textures of our products firsthand. Test and compare our colors directly at your project site to ensure the perfect selection and seamless integration into your space.

RINOX PARTNER

Cutting-Edge Fiberglass Pools

Aquarino and Dolphin have merged, making the group the largest manufacturer of fiberglass pools in Canada. Initially, they remained as two separate companies, but we have recently combined our strengths under a new brand: Azoria. This merger aims to leverage the complementary strengths of both companies and offer a broader range of products, catering to backyards of all sizes and styles, whether urban or rural. By bringing together our expertise and resources, we are better positioned to innovate, enhance product quality, and provide exceptional service to our clients.

Natural wood look

Rialux offers unique aluminum panel collections with a natural wood-like finish. Whether you prefer a modern, industrial, or classic style, Rialux products are suitable for all architectural preferences. With Rialux, you have the freedom to elevate your architectural projects with durable and versatile aluminum panels that not only enhance the visual appeal but also provide long-lasting performance. Explore the possibilities and let your creativity flourish with Rialux.

Easy to install, elegant and with a 25-year warranty, Rialux products are ideal for any exterior or interior siding project. Its many market-leading advantages make it a must-have for today's architectural projects. Rialux aluminum siding products have been rigorously tested and approved by a third-party laboratory. Our aluminum panels are of superior quality and meet all industry standards, including the extreme environmental conditions of the North American climate.
